| 12 | 2023-01-22 | Valentin Garbe | Everyone else | Christoph Klingenberg | Lara Sulzbach | |
| 13 | 2023-01-29 | Moritz Rauen | Everyone else | Deniz Deli | Lara Sulzbach | |
| 14 | 2023-02-05 | Valentin Garbe | Everyone else | Amelie Regl | Lara Sulzbach | Demo day! |
| 15 | 2023-02-12 | Moritz Rauen | Everyone else | Florian Oberndörfer | Lara Sulzbach | Retrospective |
| | | | | | | |
| roduct | owners, software | developers, and Scurm Ma | aster are set and ideally don't change | over time; the critical part is the Re | lease Manager role you need to | define here |
| | | | | | | |

| Goals | Be respectful to each other |
|-------------------------|--|
| | Have fun together |
| | Learn new things, improve software engineering, team-working skills |
| | create valuable outcome |
| | Help each other |
| Meeting norms | Be on time |
| | Inform the team about unavalability |
| | Keep it short and conciese |
| Working norms | Ask for help, support each other |
| | follow coding best-practices: work on feature-branch, comment code, commit often |
| Coordination norms | SD can assign themselves to tickets in the sprint backlog |
| | PO's are moderating the team meeting |
| | Every new code must be reviewed before merge |
| | Do technical reviews before assigning to a new issue |
| Communication norms | Communication is mainly over Slack |
| | internal communication in German, external in English |
| | Honestly over performance, do not try to cover mistakes |
| Consideration norms | PO's should lead the discussion |
| Cont. improvement norms | Give directly adressed and constructive feedback |
| Rewards | |
| Sanctions | If you are not in the team meeting at 12.35 without excuse, SD's have to do an extra review, PO's have to take over the next sprint moderating |
| Signatures | |
| Scrum Master | Lara Sulzbach |
| Product owner | Valentin Garbe |

| Software developer | Oliver Schnell |
| Software developer | Amelie Regl |
| Software developer | Florian Oberndörfer |
| Software developer | Christoph Klingenberg |
| Software developer | Dirk Engelhard |
| Software developer | Deniz Deli |

amos2024ws02-planning-document Product Goal

| Product Vision | Project Mission |
|--|---|
| | |
| Databackups are an essential functionality for businesses. They ensure, that no important information or artifacts of work is lost due to technical errors or hacking. This metadata analizer aims to help detect problems or anomalies with backups. This problem detection is done in a timely manor, and in some cases even predictively, to help the customer to react before major damages occur. | This project aims to explore which data analysis methods are applicable and useful to for the metadata, which is generated by the industry partner's software "SESAM". Furthermore, the results of the analysis are condensed into insights and displayed with graphs and alerts. This will help the customer to better understand their backup data and focus on the important take aways. |
| | |
| | |

amos2024ws02-planning-document Product Glossary

| Term | Definition |
|--------------------------|---|
| Analyzer | Our Python Backen Module which handles the AI analyzer |
| Backend | Our Main Backend Module which connects Frontent, Database and Analyzer |
| Monorepo | A monorepo is a single repository housing code for multiple projects |
| Size Alert | Alert that has been triggered because the size of the backup increased or decreased significantly in comparison to the previous one of same backup type |
| Creation Date Alert | Alert that has been triggered because the creation date of the backup was signifantly different than the defined time in the schedule |
| Storage Fill Alert | Alert that has been triggered because the data stores high water mark is reached |
| Saveset | Id of the backup the user knows |
| Backup Type FULL | Full Backup |
| Backup Type INCREMENTAL | Contains all changes since last backup of this type (or FULL if no other INCREMENTAL backup) |
| Backup Type DIFFERENTIAL | Contains all changes since last backup of type FULL |
| Backup Type COPY | Same like FULL but without INC or DIFF backups being based on this |
| Task | Specifies what should be saved and is linked with where and when it should be saved |
| Data Store | A storage where backups are saved |
| Schedule | Defines when a task for creating a backup should be started (e.g. every mondy and thursday at 10am) |
| Mail Receiver | Email adress to which an email ist sent as soon as an alert is triggered |
| | |
| | |
| | |

| | | Filter by Backup ID is broken | 3 | | 1 | |

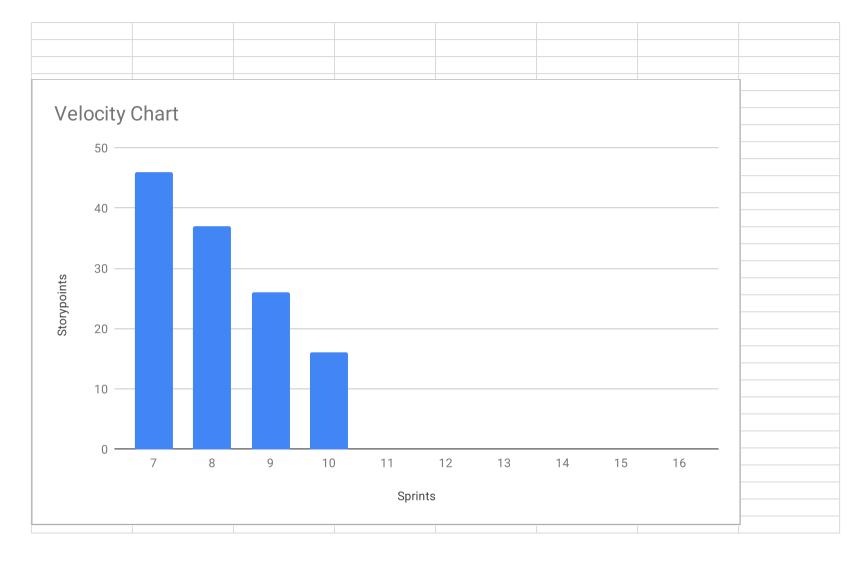

amos2024ws02-planning-document Final Project Release plan

| Sprint | Goal | Feature Name | Est. Size | Est. Remaining | Real Size | Real Remaining |
|--------|------|--|-----------|-------------------|-----------|-------------------|
| _ | | | | | | |
| 9 | | Frontend Module: Filter backup table by backup type | 2 | | 2 | |
| | | Backend Module: API for requesting all or selected backup types for backup table | 1 | | 2 | |
| | | Frontend: Email notification reciever list | 3 | | 3 | |
| | | Frontend: Show selected filter values for bar chart diagramm | 2 | | 1 | |
| | | Analysis Module: Time series analysis enhancement - Parameterization | 5 | | 5 | |
| | | Frontend Module: Filter backup size bar chart by backup type | 2 | | 2 | |
| | | Filter backups for Root backups | 2 | | 2 | |
| | | Frontend Module: Alert Panel - Backup Storage Fill Alert | 2 | | 3 | |
| | | Times in dump do not exactly match backend Database time | 1 | | 1 | |
| | | Fix Dev branch for next sprin | 5 | | 5 | |
| 10 | | Analyisis & Backend Module: Improve creation time alert logic by using schedules | 3 | | 5 | |
| | | Frontend module: Show schedule time of task in Frontend (creation time alert, backup table) | 5 | | 2 | |
| | | Frontend Module: Trigger Analyzer manually per Button Click event | 3 | | 3 | |
| | | Research: Best way to use Time Series Analysis for Backup size alert | 3 | | 2 | |
| | | Backend Module: API to request all or selected backup types for backup size bar chart | 3 | | 2 | |
| | | Backend Module: API to trigger analyzer module | 2 | | 2 | |
| | | Frontend, Analyzer, Backend: Storage Fill Element | 5 | | 5 | |
| | | Update Glossary in Planning Document | 2 | | 1 | |
| | | Frontened/Backend Module: About Info-Text Panel | 3 | | 2 | |
| | | Frontend Module: Refactor Homepage design | 3 | | 3 | |
| | | Clean up 2 | 8 | | 13 | |
| | | Update GitHub Wiki | 2 | | 2 | |
| 11 | | Backend Module: Implement API for estimated storage overflow time | 3 | | | |
| | | Frontend Module: Estimated storage overflow time displayed in Data Stores panel | 2 | | | |
| | | Frontend/Backend Module: Overview about total backups | 3 | | | |
| | | Backend/Frontend Moduel: Save all alert creation times and display creation times of stol | 3 | | | |
| | | Backend Module: Data and API for Alert overview page with alert table | 3 | | | |
| | | Frontend: Sidebar with Navigation for pages | 3 | | | |
| | | Backend & Analyzer Module: Add schedule time to backend information for backup table | 5 | | | |
| | | Replace reoccuring storage fill alerts in the overview page | 2 | | | |
| | | Create Testconcept | | | | |
| | | Fix and Update Docker Build | 3 | | | |
| | | Clean Up 3 | | | | |
| 12 | | Integration Test: Check wheather the live database can be integrated without any problems at runtime | 2 | | | |
| 12 | | Frontend Module: Alert overview page with alert table | 5 | | | |
| | | Analyzer Module: Implement estimatated storage overflow time | 5 | | | |
